Let's find out all the details about EISENBERG Grape Seed Oil-based skincare. Autumn has always been synonymous with foliage, a wonderful riot of warm colors that play hide and seek with the warm rays of the sun. The symbol of this season and the perfect ally of the skincare routine at this time of the year is certainly the grape, whose extract represents a powerful detoxifier with anti-inflammatory and anti-aging cellular action.

EISENBERG Grape Seed Oil-based Skincare

EISENBERG, always attentive to the creation of products with innovative formulas where scientific research works in synergy with ingredients with multiple properties, has always considered grapes a fundamental ingredient for the formulation of some of its must-haves.

Grape seed oil stimulates the production of collagen, which keeps the skin supple and young, nourishes and penetrates quickly into the skin and helps fight against the natural or premature aging of all skins. This property was discovered a long time ago also by our ancestors, who used to cleanse their face with grape juice.

Here are the main Eisenberg skincare and makeup products formulated with grape extract seeds.
