

A woman is lying on her back, receiving a massage. She has her eyes closed and a relaxed expression. Her head is resting on a towel, and her hair is dark and slightly damp. A hand is visible, gently massaging her shoulder. In the foreground, there are several white orchids with yellow centers, arranged in a decorative pattern. The background is softly blurred, showing another person lying down, suggesting a spa or wellness setting. The text "Health & Beauty" is overlaid in the center of the image.

Noticeable wrinkles? Skin sagging and poorly defined facial contours?

Now more and more often men are looking for prodigious solutions and formulas to use to fight against the signs of aging.

The answer is **Complexe Anti-Age** , a cream with an ultra-fine texture and rich in anti-wrinkle, anti-aging and moisturizing active ingredients designed to prevent and correct the signs of aging and protect the skin and its youth.

It is Sephora Italia's best-selling male skincare product, particularly appreciated by men who wish to counteract sagging skin and the formation of wrinkles associated with the slowdown in collagen and elastin production or with weight loss.

Complexe Anti-Age is ideal for all skin types, free from dyes, practical and easy to apply and perfect because it offers deep hydration for the face and eye contour in a single solution.

Price: 102.00 euros

EISENBERG Paris products are distributed at the Sephora, Douglas Group and Pinalli beauty stores and on the website www.eisenberg.com.
