

EISENBERG HOMME: ANTI-AGE FIRMING ANTI-WRINKLE COMPLEX FOR THE FACE AND EYE CONTOUR

LAST POSTS,MAN

Are you tired of noticeable wrinkles? Sagging skin and poorly defined facial contours? Dads of the whole world, today I'm giving you some good advice for having beautiful skin. Its name is Eisenberg Complexe Anti-Age firming anti-wrinkle for your face and eye area.

The answer is Complexe Anti-Age, a cream with an ultra-thin texture and rich in anti-wrinkle, anti-aging and moisturizing active ingredients designed to prevent and correct the signs of aging and protect the skin and its youth. It is Sephora Italia's best-selling male skincare product, particularly appreciated by men who wish to counteract sagging skin and the formation of wrinkles associated with the slowdown in collagen and elastin production or with weight loss. Complexe Anti-Age is ideal for all skin types, free from dyes, practical and easy to apply and perfect because it offers deep hydration for the face and eye contour in a single solution.

Price: 102.00 EURO – 75 ML

INGREDIENTS:

KUKUI OIL: The peoples of the Pacific have always used this tree to soothe cuts and burns and to protect the skin from sun damage. The nuts and seeds are roasted and pressed to extract a clear oil which is distinguished by its composition in Essential Fatty Acids (oleic and linoleic). Very sensorial, this oil softens the skin, soothes it and relieves any marks by moisturizing it. It also fights against the natural and premature aging of the skin.

SILK PROTEIN

Sericin is a glycoprotein extracted from silk, obtained exclusively from mulberry Bombyx. It produces a delicate double thread of silk, protected by Sericin. Today this natural principle is reproduced in an innovative active ingredient with unique performance. Its hydroxy amino acid content is essential for retaining water and regulating the skin's moisture content. Its structure allows it to act significantly on the depth of wrinkles and to improve the micro-relief of the skin. Its strong affinity for other proteins allows it to bind to the skin's keratin to form a hydrating, protective and anti-wrinkle film on the skin's surface. The hydrating, anti-irritant, film-forming and anti-wrinkle virtues of this natural ingredient make it a first choice ally.

HIGH MOLECULAR WEIGHT HYALURONIC ACID

An active ingredient of biotechnological origin, this biopolymer hydrates the upper layers of the epidermis by forming a film on the skin's surface. It helps to preserve the main characteristics of young skin, such as elasticity, flexibility and tone.

EISENBERG Paris products are distributed at the Sephora, Douglas Group and Pinalli beauty stores and on the website www.eisenberg.com.
