### EISENBERG'S WELLNESS AND COCOONING IDEAS

Often neglected due to lack of time, the face mask is a treatment to be included in your beauty routine at least once a week to give the skin specific benefits, respond to a skin need and protect it from external aggressions. Whether regenerating, soothing, moisturizing or purifying, the skin regains its balance and all its radiance. But how to recognize the most suitable mask for your skin or your needs? So here are some tips from EISENBERG to recognize your skin's needs and apply the most suitable mask with a self-massage gesture capable of giving immediate well-being to the skin and mind and optimizing the effectiveness of daily treatments. In just a few minutes, massages release tension, stimulate blood circulation, tone muscles, reduce and eliminate impurities and toxins. The face relaxes, the skin lights up and the mind regains its serenity.
